ABOUT US

StrategEast Center for a New Economy has the mission to reinforce the values of inclusivity, connectivity, gender equality, and equal opportunities in Eurasian countries through the digital economy.

The educational center StrategEast IT HUB Eurasia is launched by StrategEast jointly with leading global software development companies in cooperation with the Ministries and local universities.

GOAL

IT HUB is aimed to facilitate the creation of a viable IT ecosystem in Eurasia and beyond.

OBJECTIVES

Increasing the number of qualified personnel among young people in the IT sector

Creating and directing high-paying job offers

Expanding the capabilities of technological entrepreneurship among young people

Attracting foreign direct investments

Increasing IT services export

Integrating the IT ecosystem into the global supply chain

VISION

To preserve and develop local human capital, we aim to create permanent jobs, support entrepreneurship in the country, attracting foreign direct investments.

IT HUB is to become a sustainable source for world-class training and employment by providing demand-driven skills development and employment opportunities to an increasing number of people, especially youth and women

STRATEGY

The Program's strategy is to enrich local specialists with skills within an enabling IT sector that will drive high-value employment growth, investment, and increased revenues/sales. Creating an IT Hub through the impetus of StrategEast and global software development companies will provide a toolset to achieve this goal.

LEARNING PROGRAM

IT Hub conducts training sessions across high-demand fields such as Business Analysis, Front-End Development, .NET Development, JAVA Development, Node.js Development, QA Engineering, and others. Students receive first-rate training from qualified practitioners. Once the graduates successfully complete the 4, 6, or 8-month blended learning training program, they are employed by global IT companies.

MILESTONES

IT HUB was launched in Tbilisi, Georgia, in February 2020 within the activity of StrategEast in the Eurasian countries – “StrategEast Global Minds Initiative”. The program is different from similar IT education programs because the students are trained in the disciplines of the highest demand for local and international IT companies. Instead of the regular “study and then seek a job,” the IT HUB program proposes a “job upon graduation.”
